

E-mail tapping is a lose-lose situation. Any mischievous person will know that you are able to eaves drop, so they will use one of hundreds of different ways to relay their information electronically. Unlike a telephone where you must speak to communicate, you may use a plethora of ways to communicate electronically. All this will do is to find minor deviants while infringing upon the sanctity of US citizens. You know, the citizens who themselves, or have had numerous family members fight and die for that which you plan to demise. The very freedom they bled for is quickly coming to have been in vain due to such blind or corrupt decisions such as these, curtailing such freedoms. Why not waste your time doing something more useful, like taking away some student and all work visas from foreigners who come here only to pillage our nation, while declaring their hatred for us. Gathering intel to harm us while on said visas. Or, better yet, go work on getting that fascist Aschroft fired...no one elected him, nor did the people elect the fraudulent president who was his appointer (Hey, the world realizes this, too, hence our appointee from OSCE; RE: www.osce.org). This act will not accomplish what you intend it for...it will ultimately be used for injustice against that which it is meant to protect. Just as submitting this comment won't accomplish what I hope protect; my freedoms, my rights, my sanity...
